

Claims

1. Pack (1), particularly for free-flowing or pasty products, with a body (2), the circumference of which is at least approximately constant or decreases slightly along at least almost its entire length, with a removal opening (6) and a filling opening (3), wherein the body (2) is tapered in one section by at least one pleat or similar shaping.
2. Pack (1) according to claim 1, wherein the body (2) is designed to taper conically over its length.
3. Pack (1) according to claim 1 or 2, wherein the body (2) is folded into a meander shape.
4. Pack (1) according to claim 3, wherein the meander-shaped pleating is only provided in the conically tapered section of the body (2).
5. Pack (1) according to one of the previous claims, wherein the body (2) is designed to be very conical in the area (9) of one of its ends.

6. Pack (1) according to one of the previous claims, **wherein** a collar (10) or similar element that projects outwards is provided at one end of the pack (1).
7. Pack (1) according to one of the previous claims, **wherein** the pack (1) is open at one end and is designed to permit closure by a lid (4).
8. Pack (1) according to claim 7, **wherein** the lid (4) is sealed on.
9. Pack (1) according to claim 7, **wherein** the lid (4) is glued on.
10. Pack (1) according to claim 7, 8 or 9, **wherein** the lid (4) is fitted on or in the body (2).
11. Pack (1) according to one of claims 7 to 10, **wherein** the lid (4) has a predetermined rupture line.
12. Pack (1) according to one of claims 7 to 11, **wherein** the lid (4) is pressed into the space created by the body (2) when the pack (1) is being emptied.
13. Pack (1) according to one of the previous claims, **wherein** the removal opening (6) is closed by sealing and / or gluing.
14. Pack (1) according to one of the previous claims, **wherein** the removal opening (6) is designed to have a specific shape, such as the approximate shape of a star.
15. Pack (1) according to one of the previous claims, **wherein** the removal opening (6) is defined by a predetermined rupture line.

16. Pack (1) according to one of the previous claims, **wherein** the removal opening (6) is designed to project.
17. Pack (1) according to one of the previous claims, **wherein** the removal opening (6) is closed by a closure.
18. Pack (1) according to claim 17, **wherein** the closure is glued or sealed on.
19. Pack (1) according to claim 17 or 18, **wherein** the closure is designed in the form of a label (8).
20. Pack (1) according to one of the previous claims, **wherein** the body (2) is produced from a plastic such as polypropylene or polyethylene.
21. Pack (1) according to claim 20, **wherein** the body (2) is manufactured by the injection moulding process.
22. Pack (1) according to claim 20, **wherein** the body (2) is produced by thermoforming.
23. Pack (1) according to one of the previous claims, **wherein** the body (2) is wound from paper and is closed along a longitudinal seam.
